Our team had the pleasure to take the role of the independent facilitator in the run-up, planning and delivery of the MoStA Design Charrette in 2014.

The willingness, ability and openness of the different interests to engage positively impresses us every single time when we get to work within this co-design format.

Having led the work on the Draft Design Codes on behalf of the Prince's Foundation with hundreds of hours of community input in 2012, provided an additional layer of enquiry, when it came to explaining and challenging the various aspects of good place-making and design qualities in the MoStA proposal development.

The beauty and detail presented in the 3D renderings - submitted as part of the detailed planning application for the MoStA site - are testimony to the fruitful work Look! St Albans, the landowner, the council and the technical teams have put here into motion. We are very proud to be part of this team effort.

Angela Koch,
Director
